AVOID ACCIDENTS

Most accidents, whether they occur in industry, on the farm, at home or on the highway, are caused by the failure of some individual to follow simple and fundamental safety rules or precautions. For this reason MOST ACCIDENTS CAN BE PREVENTED by recognizing the real cause and doing something about it before the accident occurs.

Regardless of the care used in the design and construction of any type of equipment there are conditions that cannot be completely safeguarded against without interfering with reasonable accessibility and efficient operation.

A careful operator is the best insurance against an accident.
The complete observance of one simple rule would prevent many thousand serious injuries each year.
That rule is:

Never attempt to clean, oil or adjust a machine while it is in motion.

WARNING

On machines having hydraulically, mechanically, and/or cable controlled equipment (such as shovels, loaders, dozers, scrapers, etc.) be certain the equipment is lowered to the ground before servicing, adjusting and/or repairing. If it is necessary to have the hydraulically, mechanically, and/or cable controlled equipment partially or fully raised to gain access to certain items, be sure the equipment is suitably supported by means other than the hydraulic lift cylinders, cable and/or mechanical devices used for controlling the equipment.

CALIFORNIA

Proposition 65 Warning

Diesel engine exhaust and some of its constituents are known to the State of California to cause cancer, birth defects, and other reproductive harm.

Catálogo de peças de reposição - Parts catalog

ATENÇÃO	Leia atentamente o Manual de Operação e Manutenção antes de colocar a máquina em funcionamento, ou efetuar qualquer tipo de intervenção na máquina.
WARNING	Study the operation and Maintenance Instruction Manual trougth before starting, operating maintainning, fueling or servicing this machine

É proibida a reprodução do texto e das figuras.

Text and figures of this catalog may not be reproduced

FIATALLIS LATINO AMERICANA S.A. - "TECNOLOGIA GANHANDO TERRENO" - PUBLICAÇÕES TÉCNICAS

6th issue - 6ª Edizione - 6eme Edition - 6e Ausgabe - 6ª Edición - 6ª Edição - VIII/1997 FA 75314775

ADVERTÉNCIA

Este tipo de encadernação, a base de cola é feita para permitir a introdução de folhas para atualização. Para este fim, basta remover a folha a ser substituída retirando-a de cima para baixo. Inserir as novas atualizações nos respectivos lugares e recompor o livro utilizando a pasta nº 8320414 disponível nos concessionários.

ADVERTENCIA

El tipo de encuadernación a base de cola adoptado en esta publicación facilita , cuando sea preciso, la sustitución de las hojas de revisión. Para ello despegue con la mano las hojas que han de sustituirse, tirando de ellas de arriba abajo, y siguiendo la linea de encolado. Luego inserte las hojas nuevas en la posición que corresponde y reúna la publicación mediante una carpeta de anillos, que puede usted encargar a su concesionario de zona ditando el numero de catálogo 8320414.

NOTICE

The type of bindin with glue used for this book, allows, if required, to easily insert supplement sheets. For this purpose, it is sufficient to remove the sheet to be replaced, by pulling them across, from top to bottom, along the bond line. Next insert the new sheets in the appropriate position and reassemble book using the binder form 8320414 available at your local Dealer.

AVVERTENZA

Il tipo de rilegatura a colla adottato per questa pubblicazione consente, in caso di necessitá, il facile inserimento dei fogli di supplemento. A tale scopo, sufficiente distaccare manualmente i fogli da sostituire, tirandoli trasversalmente dall'alto verso il basso lungo la linea di incollaggio. Inserire quindi i fogli nuovi nelle rispettive posizioni e ricomporre la pubblicazione mediante raccoglitore ad anelli, ottenibile con il nº di ordinazione 8320414 dal Vostro Concessionario di Zona.

AVERTISSEMENT

Le type de reliure par collage adapté pour cette publication permet, au besoin, le facile des feuiles de supplément. A cet effet, il suffit de détacher à la main les feuilles à remplacer, en les tirant de travers d'en haut en bas, le long de la ligne de collage. Caler alors les nouvelles feuilles aux emplacements respectifs et refaire la publication par le classeur à bagues qui peut être demandé au Concessionnaire de votre zone avec le nº de commande 8320414.

ZUR BEACHTUNG

Die fur diese Veroffentlichung angewandte Ruckenleimung zum Heften der zusammengelegten Bogen soll das Einfugen von Ergänzungsblattern erleichtern. Die auszatauschenden Blätter konnen durch Ziehen von oben nach unten leicht entfernt werden. Nach dem Einfugen der neuen Blätter empfiehlt es sich die Veröffentlichung in eine Mappe mit Heftringen einzulegen, die Sie von ihrem Werkshändler unter der Bestellnr 8320414 beziehen können.

EVITE OS ACIDENTES

A maior parte dos acidentes que ocorrem nas indústrias, nas fazendas, em casa ou nas estradas, são causadas pela imprudência e falta de observação das normas e regras de segurança.

Por esta razão A MAIOR PARTE DOS ACIDENTES PODEM SER EVITADOS, basta prever as possíveis causas e atuar com a necessária cautela e prudência. Para qualquer tipo de máquina, por melhor que seja projetada e construída, não é possível excluir a hipótese de possíveis acidentes, sem inconvenientes de algumas de suas características básicas, acesso e um funcionamento melhor.

Um operador cuidadoso e cauteloso é a maior garantia contra os acidentes. A observância cuidadosa de somente uma norma de segurança já é bastante importante para evitar muitos desastres graves.

Esta norma é:

Nunca tente limpar, engraxar ou dar manutenção com a máquina em funcionamento.

AVISO

Antes de fazer qualquer operação de manutenção, regulagem ou reparos sobre máquinas dotadas de implementos hidráulicos, mecânicos ou com cabos (exemplo: pá-carregadeira, trator, scraper, etc.) é necessário que os implementos estejam abaixados e apoiados sobre o solo. Na eventual necessidade de acesso em alguma parte da máquina que seja preciso levantar o implemento, é indispensável apoia-lo bem firme e com meios adequados e estáveis, que não sejam aqueles previstos para seu acionamento.

EVITE LOS ACCIDENTES

La mayoría de los accidentes que se verifican durante las faenas son imputables a la infracción de secillas normas de seguridad o de elementales precauciones. Por esta razón, en la mayoría de los casos pueden prevenirse enterándose de sus posibles causas y adoptando previamente oportunas y prudentes medidas cautelativas.

Por bién proyectada o construida que se presente cualquier tipo de máquina no puede prescindirse en absoluto de posibles accidentes, sin trastornar algunas de sus características basicas para ganar acceso a un funcionamento mejor.

Un operador cuidadoso y prudente representa la mejor póliza de seguros contra los accidentes. El concienzudo cumplimento de tan sólo una elemental norma de seguridad sería de suyo suficiente para evitar murchas graves desgracias. Esta norma es:

Nunca trate de limpiar, engrasar, reportar ni reparar la máquina mientras funciona. Deténgala.

AVISO

Antes de emprender cualquier operación de manutención, reglaje o reparación de máquinas equipadas con útiles accionados mecánica o hidráulicamente, o con cables (ejemplo: palas cargadoras, abretrochas, traílas, etc.) es preciso apoyar el útil en el suelo.

Suponiendo que para tener acceso a alguna parte de la máquina sea preciso levantar el útil, es indispensable sujetarlo bien firme y con medios estables, que no sean aquellos previstos para su accionamiento.

AVOID ACCIDENTS

Most accidents, whether they occur in industry, on the farm, at home or on the highway, are caused by the failure of some individual to follow simple and fundamental safety rules or precautions. For this reason MOST ACCIDENTS CAN BE PREVENTED by recognizing this real cause and doing something about it before the accident occurs.

Regardless of the care used in the design and constructions of any type of equipment there are many conditions that cannot be completely safeguarded against without interfering with reasonable accessibility and efficient operation.

A careful operator is the best insurance against an accident. The complete observance of one simple rule would prevent many thousand serious injuries each year.

That rule is:

Never attempt to clean, oil or adjust a machine while it is in motion.

WARNING

On machines having hydraulically, mechanically, and/or cable controlled equipment (such as shovels, loaders, dozers, scrapers, etc.) be certain the equipment is lowered to the ground before servicing, adjusting and/or repairing. If it is necessary to have the hydraulically, mechanically and/or cable controlled equipment partially or fully raised to gain access to certain items, be sure the equipment is suitably supported by means other than the hydraulic lift cylinders, cable and/or mechanical devices used for controlling the equipment.

EVITARE GLI INDICENTI

La maggior parte degli incidenti ed infortuni che si verificano negli stabilimenti, nelle aziende agricole, in casa o sulle strade, sono causati dalla mancata osservanza di qualche semplice e fondamentale regola di prudenza e di sicurezza. Per questa ragione NELLA MAGGIORANZA DEI CASI ESSI POSSONO ESSERE EVITATI: basta prevederne le possibili cause ed agire di conseguenza con la necessaria cautela e prudenza.

Con qualsiasi tipo di macchina, per quanto ben progettata e costruita, non é possibile escludere in assoluto ogni eventualitá di incidente senza interferire negativamente su alcune caratteristiche essenziali per una ragionevole accessibilità e per un funzionamento efficiente.

Un operatore attento e prudente la migliore garanzia contro gli incidenti. L'osservanza scrupolosa di una sola ed elementare norma di sicurezza sarebbe già sufficiente ad evitare molti infortuni gravi. Questa norma é:

Non eseguire mai alcun intervento di pulizia, lubrificazione o manutenzione con la macchina in movimento.

ATTENZIONE

Prima di eseguire qualsiasi operazione di manutenzione, regolazione o riparazioni su macchine dotate di attrezzature comandate idraulicamente, meccanicamente o mediante funi (ad esempio pale caricatrici, apripista, ruspe, ecc) occorre accertarsi che l'attrezzatura sia abbassata ed appoggiata al suolo. Se per poter accedere a qualche parte della macchina occorre che l'attrezzatura resti in posizione sollevata, questa dovrà essere opportunamente sopportata servendosi di mezzi che non siano quelli previsti per il comando.

EVITEZ LES ACCIDENTS

La plupart des accidents qui se produisent dans les exploitations industrielles ou agricoles, à la maison ou sur la route, sont d s à l'inobservation de r gles de sécurité ou de précautions simples et élémentaires. C'est pourquoi la plupart des accidents peuvent être évités si on en connait la cause réele et si les mesures nécessaires sont prises avant qu'ils ne se produisent. Quelque soit le soin apporté à l'étude et à la construction de n'importe quel type d'équipement, il existe un certain nombre de risques contre lesquels il est impossible de se prémunir sans compromettre l'accessibilité et le bon fonctionnement des organes.

Un conducteur prudent constitue la meilleure assurance contre les accidents. L'obsercation stricte d'une r gle simple et unique permettrait d'éviter des milliers d'accidents graves chqeue année. Cette r gle est la suivante: Ne jamais tenter de nettoyer, graisser ou régler une macchine en marche.

ATTENTION

Avant de procéder à l'entretien, au réglage ou à la réparation d'engins, tels que pelles, chargeuses, bouteurs, scrapers, etc, munis d'equipements à commande hydraulique, mécanique ou par càbles, assurez-vous que ces équipements ont été descendus jusqu'au sol. Si, pour procéder à l'entretien, au réglage ou à la réparation des engins, il est nécessaire de lever partiellement ou entièrement les équipements à commande hydraulique, mécanique ou par càbles pour pouvoir accéder a certains organes, assurez-vous que ces équipements sont convenablement supportés par d'autres moyens que les cylindres de levage hydrauliques, les càbles ou les dispositifs mécaniques utilisés pour leur commande.

UNFALLVERHUTUNG

Die meisten Unfälle sind darauf zuruckfuhren , dass einfache und grundlengende Sicherheitsvorschriften oder Vorsichtsmassregeln nicht beachtet werden. Dies gilt gleichermassen fur Unfalle in der Industrie, in der Landwirtschaft im Haushalt und im Strassenverkehr. Aus diesem Grund KONNEN DIE MEISTEN UNFÄLLE VERHUTET WERDEN, sofern man die möglichen Ursachen kennt un die erforderliche Vorsicht ubt.

Auch bei durchdachter Konstruktion un sorgfaltiger Herstellung einer Maschine ist es kaum moglich das Zustandekommen eines Unfalles absolut zu vermeiden, ohne dabei manche unentbehrliche Maschinmenmerkmale hinsichtlich Zuganglichkeit und Leistungsfahigkeit zuviel zu beeintrachtigen.

Vorsicht ist der beste Unfallschutz. Bereits die Einhaltung einer einfachen Sicherheitsvorschrift kann einer Vielzahl shwerer Unfalle vermeiden lassen.

Diese Vorschrift lautet:

Wartungsarbeiten (Reinigung, Schmierung, Instandchaltung) durfen nicht warend des Maschinenbetriebs durchgefurhrt werden.

ACHTUNG

Vor allen Wartungs und Instandsetzungsarbeiten an Maschinen mit hydraulisch, mechanisch oder durch Seilzue gesteueten Arbeitsgeraten (z.B. Schaufellader, Planierschilder, Flachbaggergerate usw) sind diese auf den Boden abzusetzen. Sind die betreffenden Teile nur bei hochgestellen Arbeitseinrichtungen zuganglich, so sind diese standsicher zu unterbauen; hierzu reichen die Steuervorrichtungen des jeweiling Arbeitsgerats nicht aus.

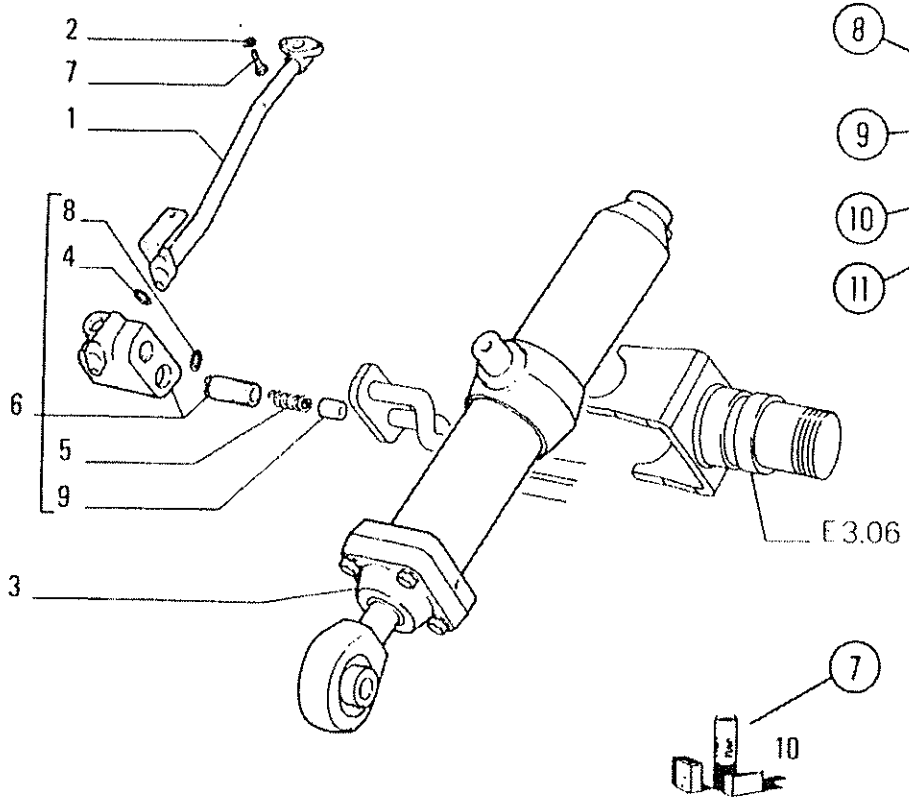

USE OF THE CATALOG

To locate the separate parts correctly, proceed as follows:
a) Consult **the version list** on page 11 to find the code number of the version involved: see following for 1 **(6)**
b) Consult the illustrations and the associated **spare parts lists** as directed below in 1 and 2.

1. Illustrations (see example on page 6)
Illustrations show t e spare parts of each subgroup. The spare parts illustrated are identified by **reference number** (ITEM). This number may be replaced by other indications, fo example:
E3.06: part shown onl In subgroup **E3.06**
Moreover ,each illust ation shows:
- **Subgroup number (1)**- **Sheet number (2)** used when one subgroup covers several sheets, and - **updating indication (3)**, for example: Suffix **06**, to print no. **604.01.046**, indicates that subgroup modification is shown in updating of the catalog dated **23-2-81**. When code (3), is missing, no changes were introduced. **Updating publication description, if any (4): subgroup title (5) - version code(6)** whith reference to previous point (a).
In lack of said codes, the illustration aplies to all model versions covere by the catalog.
- **Indication of part kit (7)**, with associated part numbers and part kit symbol. (See page 9 for kit composition).

2. Spare parts list (See example on page 2/1)
They list the spare parts of each subgroup contained in the corresponding illustrations. The following is shown for each parts.
(8) ITEM: **number associating the part shown with the respective "part number".**
(9) PART NUMBER: **spare part order number.**
(10) Q.TY: **total quantity of the part**. The quantity may be replaced by the following indications:
L = Supplied by length, **K** = kit to be ordered in the desired quantity.
(11) TRANS. CODE: **For retrieval of the French, German, Spanish translations** of the part name (consult the basic part names in the last section of catalog;page A1).

(12) DESCRIPTION / DENOMINAZIONE: **Description of the part in English and Italian.** In case of modification, the part name is completed by the EFFECTIVENESS INDICATION and DIRECTION FOR REPLACEMENT effectiveness example:
Up to frame no. 004652 **(13)**: installed on machines with frame nos. up to 004652.
From frames no. 004653 **(14)**: installed on machine with frame nrs. from 004653.
Examples of direction for replacement:
4606783 = 79021573 **(15)**: on exhaustion of stocks of part 4606783 fit part 79021573.
4606787 = 79021574 + 79021576 **(16)**: on exhaustion of stocks of part 4606787 fit part 79021574 plus 79021576.
4606792 = 79021576 - 4606794 **(17)**: on exhaustion of stocks of part 4606792 fit 79021576 and discard 4606794.
If no directions for replacement are given under effectiveness indication, this means that the old and new parts are not interchangeable and, hence, the former must be supplied as spare.
Other useful indications may be provided **(18)** under DESCRIPTION DENOMINAZIONE after sign - (for French, German, Spanish equivalents see adltional list heading the basic part name list page A0). Terms RIGTH/DESTRO and LEFT/ SINISTRO refer to the direction of machine forward travel.
Should the word WRONG appear next to a part name without the corresponding CORRECT on the line immediately below it means that the associated part was erroneously included at an earlier stage.
(19) Reference symbol for trading the illustration on the fiche and model.
(20) Subgroup, Illustration number (when the subgroup includes more than one illustration), page number (when the listing for one illustration takes more than one page).
(21) Optional equipament code: This number indicates that parts listed and marked (*) belong to that given **equipament**. If on the contrary the code appears on the illustration only, it means that all parts of the subgroup belong to the special equipment in question .
(22) Standard part dimensional data.

MODO DE USAR O CATÁLOGO

Para pedir corretamente as peças de reposição é necessário:
a) Consulte a lista de versões, pág. 11, para identificar no seu caso o código numérico de versão que lhe interessa (veja o parágrafo 1, item 7).

b) Consulte as figuras e as respectivas listas de peças, conforme é explicada nos parágrafos 1 e 2.

1 - FIGURAS (veja o exemplo, pág. 8)
Representam as peças de reposição de cada subgrupo em que se divide a máquina.
As peças de reposição representadas se designam mediante um número de referência (ITEM), o qual pode ser substituído por outras indicações. Exemplo: E3.06, peça ilustrada unicamente no SGR. E3.06.
O código do subgrupo **1** e o número do quadro **2**: Quando o mesmo subgrupo compreende em mais de uma figura.
Número do ITE (Informatico Técnico) data da emissão **3** - Número de cadastro de cada ITE **4**. Ao constar os itens 3, 4 na respectiva folha do catálogo, indica que este quadro houve modificações através do ITE 3.
Existem ITE's com apenas informações por escrito não alterando a figura. Neste caso anotar as informações contidas no ITE, o número e a data na respectiva folha do catálogo.
Denominação do subgrupo **5** , o código de versão **6**, com referência ao item (a) dito anteriormente, entende-se que a figura é aplicável a todas versões do modelo que trata o catálogo.
A indicação da existência de kits de reposição **7**, com respectivos números apresentados no próprio quadro ou na página 9 a respectiva composição.
O sentido da seta no qual está indicada na figura, refere-se o sentido de marcha (FRENTE) da máquina, tomando como ponto de referência o posto do operador (ASSENTO), sentado ao volante 9 o mesmo ocorre com os termos DIREITO e ESQUERDO, empregados na lista de peças do catálogo.

2 - LISTA DAS PEÇAS DE REPOSIÇÃO (veja o exemplo, pág. 8)
Nelas se dispõem as peças de reposição de cada subgrupo representadas nas figuras correspondentes, indicando para cada peça:
8 ITEM: é o número de cada peça representada, que é acompanhada do número da peça para reposição
9 PEÇA: Número de cada peça de reposição do catálogo.
10 QTD : Número total de peças representadas na figura com a quantidade específica para cada modelo de máquina. Este número pode ser substituído pelas seguintes indicações: * = pedaços de medida ou quantidade necessária; k= quantidade necessária para a reparação.
11 TRADUÇÃO: Código para buscar a tradução para o inglês, francês, alemão, e espanhol da denominação (consulte a lista de denominações GLOSSÁRIO no final do catálogo).
12 DENOMINAÇÃO/DESCRIPTION: Denominação da peça em português e inglês. No caso de modificações, a denominação vem acompanhada pela indicação de sua aplicação ou pelas normas de reposição.
Exemplo de indicação de aplicação na modificação:
- Até o chassi nº 004652 **13**: Utilizada nas máquinas com chassi até o nº 004652.
- A partir do chassi nº 004653 **14**: Utilizada nas máquinas a partir do chassi nº 004653.
Exemplo de normas de reposição:
4606783 = 79021573 **15**: Ao esgotar o estoque da peça 4606783, use a peça 79021573.
4606787 = 79021574 + 79021576 **16**: Ao esgotar o estoque da peça 4606787 use a peça 79021574 mais a peça 79021576.
4606792 = 79021576 - 4606794 **17**: Ao esgotar o estoque da peça 4606792 use a peça 79021576 eliminando a peça 4606794.
Supondo que a indicação de utilização não acompanhe normas de reposição, significa que a reposição da peça ante-modificação , deve ser mantida, por não ser intercambiável com a peça pós-modificação.
Outras indicações úteis **18** podem ser acrescidas na coluna DENOMINAÇÃO/DESCRIPTION (a tradução destas palavras ao italiano, francês, alemão e espanhol, estão na lista de palavras suplementares que precede a lista de denominações).
As palavras DIREITO/RIGHT e ESQUERDO/LEFT se referem ao sentido de marcha da máquina.
Supondo que numa denominação acompanhada a palavra onde se lê ERRADO/WRONG e na linha seguinte não aparece a correspondente leia-se CORRETO/CORRECT , significa que a peça sobra por erro.
20 Subgrupo, número da figura (quadro), número da página. **19** Modelo da máquina. **21** Número de código do opcional: indica que as peças com a marcação (*) pertencem ao opcional indicado.
Se o código aparece na figura, significa que todas as peças deste subgrupo pertencem a este opcional.
22 Dimensões de peças normalizadas.

NOTICE

The rigth reserved to change the construction or material of any parts where it seems desirable to do so without incurring the obligation of installing such changes on units already delivered.
Additional publications pertaining to this model and to all other FIATALLIS produts are available through FIATALLIS dealers. Publications are generally available in several languages.

INSTRUCTIONS FOR ORDERING PARTS

At the time this parts catalog was published the listed part numbers were current. It is our policy to constantly improve our machines and therefore, part numbers and design may change.
When ordering parts, verify part numbers through yours dealer's microfiche and master numerical index which are up to date with all the latest part numbers.

ORDER PARTS FROM THE DEALER COVERING THE LOCAL TERRITORY

Orders for spare parts must include the following data (See page 11)

- Model, Serial Number, Engine Model, Engine serial number, marked on engine block.
- Specify the part (shown on Spare Parts Catalog list), possibly completed by it description.

If parts refer to an assembly which has a model or serial number, also include this information.

- Give post office address, town, county and state where parts are to be shipped.
- Also specify whether material is to be shipped by freight, express or parcel post.
- Confirm all telephone or telegraph orders in writing.

Parts can only be returned to/through the dealer from whom the parts were purchased and **must have prior written authorization.** Each return will be treated individually.
Unless claims for shortages or error are made inmediately upon receipt of goods, they will not be considered.
When broken goods are received, a full description of the damage should me made by the carrier agent on the fregth bill.
FIATALLIS responsability is limited, and ceases upon completion of sale conditions provided for each delivery.

ATENÇÃO

A FIATALLIS reserva o direito de modificar a construção ou o material de qualquer peça, se julgar necessário, mas sem obrigar-se a aplicar tais modificações às unidades já em serviço.

COMO FAZER OS PEDIDOS

Os números de peça do catálogo inclusas nesta publicação estão em dia até a data de saída deste da FIATALLIS. Nossa política consiste no intento de melhorar constantemente nossa máquinas, e portanto, os números de peças do catálogo às vezes, podem não ser efetivos. No momento de pedir as peças de reposição, verifique os números de peças do catálogo com seu Concessionário, o qual dispõe de microfichas e da lista de peças geral atualizada.f

FAÇA OS PEDIDOS AO CONCESSIONÁRIO DE SUA REGIÃO

Os pedidos de peças de reposição, devem conter os seguintes dados (veja pág. 11):

- Modelo da máquina, nº de série do chassi, modelo do motor, nº de série do motor.
- Indicar o nº da peça pedida - tal qual ilustrada na lista de peças - possivelmente acompanhada da denominação correspondente.

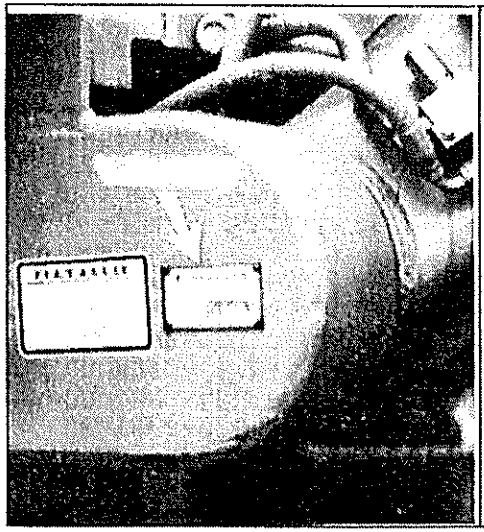

Se as peças pertendem a um conjunto que possue seu próprio número de modelo ou de série, indique este dado.

- No endereço indique o código de endereçamento postal, a cidade, o estado, e a nação para que possa remeter as peças pedidas.
- Indique a modalidade de expedição do material: marítimo, terrestre, aérea ou via correio.

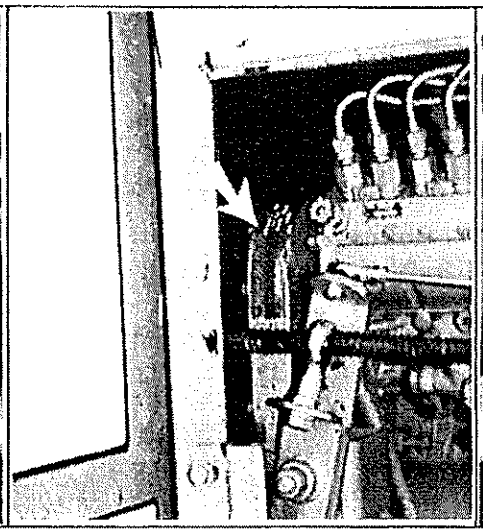

Eventuais devoluções de peças poderão efetuar-se somente por intermédio do Concessionário do qual as peças foram compradas, e **deverão ser previamente autorizadas por escrito**. Cada devolução será analisada conforme cada caso.
As reclamações por faltas ou defeitos não serão levadas em conta, a não ser que venham efetuadas imediatamente após o recebimento do material.
No caso de receber material que sofreu danos, uma descrição completa do dano deve ser feita pelo agente transportador no documento de expedição.
A responsabilidade da FIATALLIS é limitada e cessa ao cumprir-se as condições previstas para cada aquisição.
